

**WHAT'S MORE POWERFUL
THAN A FLU BUG? YOU.**

NEW RESEARCH from Henry Ford Hospital reveals 90 percent of patients who were advised to get a flu vaccine by a physician got one. That's superhero power right there!

So this flu season, help everyone stay well. Encourage all your patients 6 months and older and your staff to get the flu vaccine. They'll listen.

If you don't offer flu vaccines in your practice, send them to our website. We'll help them find a convenient location where they can follow through on your advice.
